No part of this publication may be reproduced or transmitted in any form or by any means, electronic, or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (Operations Staff, P.O. Box 765, Schenectady, New York 12301) for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1979 articles are the same as those shown for current articles.

MADE IN THE UNITED STATES OF AMERICA

# Contents of Volume 34

NUMBER 1, JULY 1979

C. J. BAYNE, M. N. MOORE, T. H. CAREFOOT, AND R. J. THOMPSON. Hemolymph Functions in *Mytilus californianus:* The Cytochemistry of Hemocytes and Their Responses to Foreign Implants and Hemolymph Factors in Phagocytosis ..... 1

H. D. BURGES, JOHN FREDERICK GROVE, AND M. POPLE. The Internal Microbial Flora of the Elm Bark Beetle, *Scolytus scolytus,* at All Stages of Its Development ..... 21

A. M. KURIS, G. O. POINAR, JR., R. HESS, AND T. J. MORRIS. Virus Particles in an Internal Parasite, *Portunion conformis* (Crustacea: isopoda: Entoniscidae), and Its Marine Crab Host, *Hemigrapsus oregonensis* ... 26

MICHIO OHBA AND KEIO AIZAWA. In Vivo Insect Hemocyte Destruction by UV-Irradiated *Chilo* Iridescent Virus ..... 32

MICHAEL C. MIX, JOYCE W. HAWKES, AND ALBERT K. SPARKS. Observations on the Ultrastructure of Large Cells Associated with Putative Neoplastic Disorders of Mussels, *Mytilus edulis,* from Yaquina Bay, Oregon 41

T. A. GOCHNAUER, R. BOCH, AND V. J. MARGETTS. Inhibition of *Ascosphaera apis* by Citral and Geraniol ..... 57

VISHNU-PRIYA SNELLER. Inhibition of *Dirofilaria immitis* in Gregarine-Infected *Aedes aegypti:* Preliminary Observations ..... 62

SOPHIE PARIS AND PIERRE FERRON. Study of the Virulence of Some Mutants of *Beauveria brongniartii (= Beauveria tenella)* ..... 71

ROBERT E. HILLMAN. Encystment of the Ciliate *Boveria teredinidi* in the Tissues of the Molluscan Woodborer *Bankia gouldi* in Barnegat Bay, New Jersey ..... 78

W. MOHRIG, D. SCHITTEK, AND R. HANSCHKE. Immunological Activation of Phagocytic Cells in *Galleria mellonella* ..... 84

NOTES

Y. CARTON AND H. KITANO. Changes in the Hemocyte Population of *Drosophila* Larvae after Single and Multiple Parasitization by *Cothonaspis* (Parasitic Cynipidae) ..... 88

E. S. SHARPE AND R. W. DETROY. Susceptibility of Japanese Beetle Larvae to *Bacillus thuringiensis:* Associated Effects of Diapause, Midgut *p*H, and Milky Disease ..... 90

E. S. SHARPE AND R. W. DETROY. Fat Body Depletion, a Debilitating Result of Milky Disease in Japanese Beetle Larvae ..... 92

R. CHARPENTIER. A Nonoccluded Virus in Nymphs of the Dragonfly *Leucorrhinia dubia* (Odonata, Anisoptera) ..... 95

PAUL F. BASCH. *Biomphalaria* Hemocyte Migration and Parasite Encapsulation in Implanted Flat Glass Tubes ..... 99

ROBERT S. ANDERSON. Cytochrome *P*-450 in Midgut Microsomes of *Spodoptera eridania* ..... 102

NUMBER 2, SEPTEMBER 1979

STEPHEN R. MACK, DAVID A. FOLEY, AND JEROME P. VANDERBERG. Hemolymph Volume of Noninfected and *Plasmodium berghei*-Infected *Anopheles stephensi* ..... 105

JUST M. VLAK. The Proteins of Nonoccluded *Autographa californica* Nuclear Polyhedrosis Virus Produced in an Established Cell Line of *Spodoptera frugiperda* ..... 110

THOMAS C. CHENG AND MARK S. BUTLER. Experimentally Induced Elevations in Acids Phosphatase Activity in Hemolymph of *Biomphalaria glabrata* (Mollusca) ..... 119

J. E. HENRY, E. A. OMA, J. A. ONSAGER, AND S. W. OLDACRE. Infection of the Corn Earworm, *Heliothis zea,* with *Nosema acridophagus* and *Nosema cuneatum* from Grasshoppers: Relative Virulence and Production of Spores ..... 125

S. B. VINSON, K. M. EDSON, AND D. B. STOLTZ. Effect of a Virus Associated with the Reproductive System of the Parasitoid Wasp, *Campoletis sonorensis,* on Host Weight Gain ..... 133

ERIC S. LOKER. Effects of *Schistosomatium douthitti* Infection on the Growth, Survival, and Reproduction of *Lymnaea catascopium* ..... 138

PETER B. ARMSTRONG AND JACK LEVIN. *In Vitro* Phagocytosis by *Limulus* Blood Cells ..... 145

THEODORE G. ANDREADIS AND DONALD W. HALL. Significance of Transovarial Infections of *Amblyospora* sp. (Microspora: Thelohaniidae) in Relation to Parasite Maintenance in the Mosquito *Culex salinarius* ..... 152

DAVID L. SMALLEY AND DONALD D. OURTH. Bacterial Genera Isolated from Field-Collected (Diapausing) and Laboratory-Reared Cotton Boll Weevils, *Anthonomus grandis* (Coleoptera: Curculionidae) ..... 158

JAMES F. KELLY AND DARRELL W. ANTHONY. Susceptibility of Spores of the Microsporidian *Nosema algerae* to Sunlight and Germicidal Ultraviolet Radiation ..... 164

WILLIAM J. MCCARTHY AND JAMES T. LAMBIASE. Serological Relationships among Plusiinae Baculoviruses ..... 170

O. ZETHNER, D. A. BROWN, AND K. A. HARRAP. Comparative Studies on the Nuclear Polyhedrosis Viruses of *Lymantria monacha* and *L. dispar* . 178

ALBERT K. SPARKS AND JOLLY HIBBITS. Black Mat Syndrome, an Invasive Mycotic Disease of the Tanner Crab, *Chionoecetes bairdi* ..... 184

JAN JAROSZ. Gut Flora of *Galleria mellonella* Suppressing Ingested Bacteria 192

M. ZAIM, K. K. BAKER, AND H. D. NEWSON. Natural Infection of the Tree Hole Breeding Mosquito *Aedes triseriatus* (Diptera: Culicidae) with the Fungus *Funicularius triseriatus* ..... 199

NOTE

OWEN G. HARRY. A Method for Highlighting Ciliates Associated with Marine and Freshwater Invertebrates ..... 203

NUMBER 3, NOVEMBER 1979

EDITORIAL ..... iii

W. MOHRIG, D. SCHITTEK, AND RENATE HANSCHKE. Investigations on Cellular Defense Reactions with *Galleria mellonella* against *Bacillus thuringiensis* ..... 207

MÁRIA JURKOVIČOVÁ. Activation of Latent Virus Infections in Larvae of *Adoxophyes orana* (Lepidoptera: Tortricidae) and *Barathra brassicae* (Lepidoptera: Noctuidae) by Foreign Polyhedra ..... 213

ANDRÉ LOPEZ. Tumoral Pathology in Spiders ..... 224

R. E. TEAKLE. Relative Pathogenicity of Nuclear Polyhedrosis Viruses from *Heliothis punctigera* and *Heliothis zea* for Larvae of *Heliothis armigera* and *Heliothis punctigera* ..... 231

SUE PEKRUL AND E. A. GRULA. Mode of Infection of the Corn Earworm (*Heliothis zea*) by *Beauveria bassiana* as Revealed by Scanning Electron Microscopy ..... 238

FRANCES R. HUNTER AND ROBERT C. BORASTON. Application of the Laurell Immunoelectrophoresis Technique to the Study of Serological Relationships between Granulosis Viruses ..... 248

JAN JAROSZ. Yeastlike Fungi from Greater Wax Moth Larvae (*Galleria mellonella*) Fed Antibiotics ..... 257

JOHN F. ANDERSON AND LOUIS A. MAGNARELLI. *Entomophthora tabanivora*, a New Pathogen in Horseflies (Diptera: Tabanidae) ..... 263

JUNKO NISHIITSUTSUJI-UWO, YASUHISA ENDO, AND MICHIO HIMENO. Mode of Action of *Bacillus thuringiensis* δ-Endotoxin: Effect on TN-368 Cells ..... 267

EUGENIA T. ZAVRAS AND HUGO A. JAMES. Carotenoids Found in *Littorina littorea* and Their Relationship to Parasitic Infection by Larva Trematodes 276

KENNETH SÖDERHÄLL, LENA HÄLL, TORGNY UNESTAM, AND LARS NYHLÉN. Attachment of Phenoloxidase to Fungal Cell Walls in Arthropod Immunity ..... 285

SHIMON BITTON, ROBERT G. KENNETH, AND ISRAEL BEN-ZE'EV. Zygospore Overwintering and Sporulative Germination in *Triplosporium fresenii* (Entomophthoraceae) Attacking *Aphis spiraecola* on Citrus in Israel ..... 295

F. C. Minion, L. B. Coons, and J. R. Broome. Characterization of the Polyhedral Envelope of the Nuclear Polyhedrosis Virus of *Heliothis virescens* ..... 303

Notes

Robert W. Ellis and Eugene G. Fuller. Mercury Interaction in Crayfish Antennal Gland and Hepatopancreas ..... 308

Zdeněk Mráček and Jaroslav Weiser. The Head Papillae of the Steinernematidae ..... 310

T. Yamamoto and Y. Tanada. Structural Damages to the Granulosis Virus of the Armyworm, *Pseudaletia unipuncta*, Caused by Sucrose Density Gradient Centrifugation ..... 312

E. S. Sharpe, A. I. Herman, and S. C. Toolan. Separation of Spores and Parasporal Crystals of *Bacillus thuringiensis* by Flotation ..... 315

David B. Levin, John E. Laing, and Robert P. Jaques. Transmission of Granulosis Virus by *Apanteles glomeratus* to Its Host *Pieris rapae*. 317

Paul G. Fast and R. Milne. *Bacillus thuringiensis* Parasporal Toxin: Dissolution of Crystals with Retention of Toxicity ..... 319

E. S. Sharpe and F. L. Baker. Ultrastructure of the Unusual Crystal of the HD-1 Isolate of *Bacillus thuringiensis* var. *kurstaki* ..... 320

A. J. De Lucca II, J. Simonson, and A. Larson. Two New Serovars of *Bacillus thuringiensis:* Serovars *dakota* and *indiana* (Serovars 15 and 16) 323

Author Index for Volume 34 ..... 325

Cumulative Subject Index for Volumes 33–34 ..... 326

# INFORMATION FOR AUTHORS

The *Journal of Invertebrate Pathology* publishes articles and notes on all aspects of original research concerned with the nature and study of microbial and amicrobial diseases of invertebrates, the suppression of these diseases in beneficial invertebrates, their use in the control of invertebrate pests, and those phases of general invertebrate microbiology that may have some relation to disease in these animals. The *Journal* is particularly dedicated to the publication of contributions of a basic and fundamental nature, although it will accept suitable articles pertaining to the applications of invertebrate pathology. The Editor-in-Chief and members of the Editorial Board will examine contributions from any qualified worker in any country of the world. Articles will be published in English. **Manuscripts should be submitted in triplicate to the Editor-in-Chief, Thomas C. Cheng, Institute for Pathobiology, Chandler Lab, Building 17, Lehigh University, Bethlehem, Pennsylvania 18015.** Inquiries concerning subscriptions and business matters should be addressed to the Publishers. **Authors will be charged for articles comprising more than 8 printed pages, including illustrations and tables, at a rate of $40.00 for each excess page.**

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Invertebrate Pathology* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

**Form of Manuscript.** Manuscripts should be typewritten, on good quality bond paper, with wide margins and double or triple spacing throughout. It is recommended that articles be subdivided into *Summary, Introduction, Material and Methods, Results, Discussion, Acknowledgments, and References*. The manuscript must begin with a Summary. Any reviewing of the literature should be restricted to closely pertinent papers. The typescript should be carefully checked for errors of content and English phraseology before it is submitted. Corrections in proofs in excess of 10% of the cost of composition of the original manuscript will be charged to authors. The manuscript should carry the name and address (including the zip code) of the person to whom proofs are to be sent, and a shortened version of the paper's title, not exceeding 45 letters and spaces in length, suitable for a running title. When reporting quantitative data, the author should include the number of individual observations, the arithmetic mean value, and the standard deviation (or the standard error of the mean). When reporting differences between means, the level of significance should be indicated.

A useful writing guide is the latest edition of the "Style Manual for Biological Journals" published by the American Institute of Biological Sciences. This Manual should also be used as a guide to most abbreviations employed. Proprietary substances and trade names must be accompanied (at the first mention) by the chemical name.

**Key words.** Each article must include a list of key words. The key words should include the taxonomic designations of organisms, both host and pathogen(s), mentioned in the text and the major subject matter, e.g., castration, parasitic; biological control; or nuclear polyhedrosis virus, pathogenicity of. The names of enzymes, substrates, and other important compounds should also appear in the list of key words. The key words should be typed double-spaced on a separate sheet of paper. The following is an example of the style to be employed: *Bacillus thuringiensis; Plodia interpunctella;* storage moth; biological control; endotoxin; bacterial epizootic.

**Figures and Tables.** Figures should be numbered consecutively with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed together on a separate sheet, double-spaced. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. This includes the lettering, which is reproduced as part of the photoengraving and is not set in type. Line drawings should be carefully drafted with black India ink on white drawing paper or blue drafting cloth, no larger than 8.5 × 11.5 inches overall (21 × 27.5 cm). The lettering should be large enough to allow a reduction of two-thirds off. High quality glossy prints are acceptable. **Xerox prints are not acceptable.** Tables and footnotes should be typed on separate pages, numbered consecutively with Arabic numbers, and collected at the end of the manuscript. All tables must have descriptive headings and should be understandable without reference to the text.

**References.** Names of the authors should be mentioned in the text, with the year of publication in parentheses. References should be listed alphabetically at the end of the paper according to the form

used in a recent number of the *Journal*. The names of journals should be abbreviated according to the Chemical Abstracts' *Service Source Index* (1969 Edition). References to books should include: author's name, year of publication, title of book (editor of book, if any), edition (if other than first), number of pages, publisher, and place of publication. Examples:

SMITH, J. O., AND JONES, M. A. 1968. The diseases of the house fly, *Musca domestica*, and other Diptera. *J. Invertebr. Pathol.*, **10**, 978–982.

DOE, J. Q. 1968. "The Diseases of Animals without Backbones," second edition. Academic Press, New York.

**Nomenclature.** Binomial Latin names should be used in accordance with International Rules of Nomenclature. The first time a binomial is used it should be fully spelled out. In papers largely *taxonomic in nature* the names (fully spelled out) of the authors of the scientific names should be used, otherwise the names of authors should be omitted.

**Notes.** Manuscripts for NOTES should be less than 500 words in length and contain not more than two illustrations or two small tables, or one of each. NOTES are intended to provide for the prompt publication of new experimental results. References should be kept at a minimum in the NOTES, and should be incorporated directly in the text as (A. B. Smith, *J. Entomol. Soc.* **19**, 289–295, 1968) or A. B. Smith (*J. Entomol. Soc.* **19**, 289–295, 1968).

**Proof.** Authors will receive two sets of galley and engraver's proof, with the original manuscript. Proof should be returned to the Journal Production Department, Academic Press, Inc., 111 Fifth Avenue, New York, N. Y. 10003.

**Reprints.** Fifty copies of each article are granted free of charge, and additional quantities may be purchased. Reprint order forms will be sent with galley proofs.
